Subject Index of Volume 135

Albumin complexes
modification of human serum albumin–heme system with metal tetrasulfonated phthalocyanines, 55
Alkyl complexes
basicity of nitrogen donors in amino-substituted methylmercury derivative of adenine; crystal structure of μ-(adeninato-μ-N^6,N^9)-bis[methylmercury(II)]·ethanol, 191
Aluminium complexes
Al activation and inhibition of human brain acetylchlolinesterase *in vitro*, 161
Amine complexes
(μ-1-methyluracilato-N^3,O^4)(μ-1-methylcytosine-N^3,O^2)-*cis*-diammineplatinum(II)·silver dinitrate·silver nitrate·2.5H_2O, 155
Ru-modified proteins; reactions of *cis*-$[Ru(NH_3)_4(OH_2)_2]^{2+}$ and *cis*-$[Ru(en)_2(OH_2)_2]^{2+}$ with azurin, myoglobin and cytochrome c, 33
synthesis and antitumor activity of organometallic *cis*-dichloro(enamine)(amine) Pt(II) complexes, 81
Amino acid complexes
exploratory ^{45}Sc NMR study into complexation of alanine and oligopeptides, 73
Pd(II) and Pt(II) ternary complexes with nucleosides and amino acids, L23
solution and solid state investigation of Cu(II)–*N*-acetyl-L-glutamine system and its *N*-methylimidazole adduct, 49
Aminomalonate compounds
spectral properties and desmotropy of Schiff base of diethylaminomalonate and pyridoxal hydrochloride, 123
Anthracycline complexes
Cu(II)–5-iminodaunorubicin complex; circular dichroism study, L17
Antiarthritic activity
synthesis and antiarthritic study of new orally active diferuloyl methane (Curcumin) Au complex, 47
Antimalaria activity
synthesis of metal complexes of antimalarial drugs and *in vitro* evaluation of their activity against *Plasmodium falciparum*, 133
Antitumor activity
aminomalonato(1,2-diaminocyclohexane)Pt(II); competitive antitumor compound within new class of neutral, chemically stable, water soluble, functionalized Pt(II) complexes, 27
Cu(II)–5-iminodaunorubicin complex; circular dichroism study, L17
synthesis, characterization and, of Fe(II) and Fe(III) complexes of 3- and 5-substituted salicylaldehyde benzoyl hydrozones, 167
synthesis and, of organometallic *cis*-dichloro(enamine)(amine) Pt(II) complexes, 81
Ascorbate complexes
EPR study of Cr(V) and radical species produced in reduction of Cr(VI) by ascorbate, 115

Bidentate ligand complexes
structure/iron binding activity of 1-hydroxypyrid-2-one chelators intended for clinical use, 145
Binuclear complexes
binuclear Cu(II) complexes as oxidase catalysts, L19
observations on structure and magnetic properties of dinuclear Cu(II) complexes derived from flexible dinucleating Schiff base ligands, L1
Bioavailability
speciation studies in relation to Mg bioavailability; formation of Mg(II) complexes with glutamate, aspartate, glycinate, lactate, pyroglutamate, pyridoxine and citrate, and appraisal of their potential significance towards Mg gastrointestinal absorption, 179
Brain complexes
Al activation and inhibition of human brain acetylcholinesterase *in vitro*, 161

Carboxylato complexes
studies on major intermediate transit Fe complex in human placenta, 23
Carcinogenic complexes
formation of Cr(V) during slow reduction of carcinogenic Cr(VI) by milk and some of its constituents, L5
Chelate complexes
synthesis of metal complexes of antimalarial drugs and *in vitro* evaluation of their activity against *Plasmodium falciparum*, 133
Chromium complexes
EPR study of Cr(V) and radical species produced in reduction of Cr(VI) by ascorbate, 115
formation of Cr(V) during slow reduction of carcinogenic Cr(VI) by milk and some of its constituents, L5
Cobalamine complexes
binding of cyanoferrates to cobaloximes and cobalamines; EHMO study, 93
Cobaloxime complexes
binding of cyanoferrates to cobaloximes and cobalamines; EHMO study, 93

© Elsevier Sequoia/Printed in Switzerland

Cobalt complexes
depyrophosphorylation of adenosine 5′-triphosphate (ATP), 119
some new derivatives of Co(III) with uracil, uridine and pyrimidine nucleotides, 197
modification of human serum albumin–heme system with metal tetrasulfonated phthalocyanines, 55
Copper complexes
binuclear Cu(II) complexes as oxidase catalysts, L19
copper(II) complexes of L-histidylglycyl-L-histidylglycine and L-histidyl-L-histidylglycylglycine; coordination mode of histidyl residues, 43
Cu(II)–5-iminodaunorubicin complex; circular dichroism study, L17
interaction of molybdenite and aqueous Cu(II), L13
observations on structure and magnetic properties of dinuclear Cu(II) complexes derived from flexible dinucleating Schiff base ligands, L1
preparation of trinuclear adducts from quadridentate Schiff base Cu(II) complexes with metal(II, III) nitrate, 1
purine nucleotide–Cu(II) binary and ternary complexes; synthesis, electron paramagnetic resonance and infrared investigation, 215
solution and solid state investigation of Cu(II)–*N*-acetyl-L-glutamine system and its *N*-methylimidazole adduct, 49
thermal decomposition of $(Cu^{I}_{8}Cu^{II}_{6}$(D-penicillamine)$_{12}Cl)^{5-}$, 5
Copper compounds
high molecular weight Zn- and Cu-binding proteins in liver of rat; effect of centrifugation, 129
Crystal structure(s)
of Cu(II)–*N*-acetyl-L-glutamine system and its *N*-methylimidazole adduct, 49
of (μ-1-methyluracilato-N^3,O^4)(μ-1-methylcytosine-N^3,O^2)-*cis*-diammineplatinum(II)·silver dinitrate·silver nitrate·2.5H_2O, 155
structural behaviour of vitamin B_1 in bonding to H and metal ions, 37
of Zn(thiamine)Cl_3·0.4H_2O, 85
Curcumin complexes
synthesis and antiarthritic study of new orally active diferuloyl methane (Curcumin) Au complex, 47
Cyanide complexes
binding of cyanoferrates to cobaloximes and cobalamines; EHMO study, 93
Cytochrome complexes
thiol-coordinated heme octapeptides of cytochrome *c*; model compounds of cytochrome P-450, 109
Cytochrome *c* complexes
interactions of fluoroanailine with heme-octapeptide of cytochrome *c*; ^{19}F NMR study, 203
Diamine complexes
aminomalonato(1,2-diaminocyclohexane)Pt(II); competitive antitumor compound within new class of neutral, chemically stable, water soluble, functionalized Pt(II) complexes, 27
Electrochemistry
electrochemical properties of tetraethylammonium tetrathiomolybdate(VI), $[(C_2H_5)_4N]_2MoS_4$, L21
Enamine complexes
synthesis and antitumor activity of organometallic *cis*-dichloro(enamine)(amine) Pt(II) complexes, 81
Enzyme complexes
Al activation and inhibition of human brain acetylcholinesterase *in vitro*, 161
binuclear Cu(II) complexes as oxidase catalysts, L19
Ferritin complexes
structure/iron binding activity of 1-hydroxypyrid-2-one chelators intended for clinical use, 145
Glucide complexes
sugar complexation with U ion; synthesis, spectroscopic and structural analysis of UO_2–fructose adducts, 67
Gold complexes
competition between Au(I) thiomalate 'myocrisin' and five-member and six-member heterocyclic ligands, 19
synthesis and antiarthritic study of new orally active diferuloyl methane (Curcumin) Au complex, 47
Haem complexes
reduction of haem peptides by dithionite; kinetic investigation, 101
Halide complexes
synthesis and antitumor activity of organometallic *cis*-dichloro(enamine)(amine) Pt(II) complexes, 81
Heme complexes
interactions of fluoroaniline with heme-octapeptide of cytochrome *c*; ^{19}F NMR study, 203
modification of human serum albumin–heme system with metal tetrasulfonated phthalocyanines, 55
Heteronuclear complexes
(μ-1-methyluracilato-N^3,O^4)(μ-1-methylcytosine-N^3,O^2)-*cis*-diammineplatinum(II)·silver dinitrate·silver nitrate·2.5H_2O, 155
Hydrazone complexes
synthesis, characterization and antitumour activity of Fe(II) and Fe(III) complexes of 3- and 5-substituted salicylaldehyde benzoyl hydrazones, 167

of biologically active organosilicon and organotin complexes of phenylglycyl hydrazones, 139

Iron complexes
binding of cyanoferrates to cobaloximes and cobalamines; EHMO study, 93
equilibria and kinetics of some metal complexes of peptide hydroxamic acids, 11
modification of human serum albumin–heme system with metal tetrasulfonated phthalocyanines, 55
Mössbauer spectroscopic studies on concentrated protoporphyrin IX Fe(II) solutions, 151
reduction of haem peptides by dithionite; kinetic investigation, 101
structure/iron binding activity of 1-hydroxypyrid-2-one chelators intended for clinical use, 145
studies on major intermediate transit Fe complex in human placenta, 23
synthesis, characterization and antitumour activity of Fe(II) and Fe(III) complexes of 3- and 5-substituted salicylaldehyde benzoyl hydrazones, 167

Kinetics and mechanism
equilibria and kinetics of some metal complexes of peptide hydroxamic acids, 11
reduction of haem peptides by dithionite, 101
speciation studies in relation to Mg bioavailability; formation of Mg(II) complexes with glutamate, aspartate, glycinate, lactate, pyroglutamate, pyridoxine and citrate, and appraisal of their potential significance towards Mg gastrointestinal absorption, 179
stabilities of bivalent metal complexes with biologically active 2-hydroxy-1,4-naphthoquinone monosemicarbazone (HNQS) in dioxan–water mixtures, 211
structure/iron binding activity of 1-hydroxypyrid-2-one chelators intended for clinical use, 145
thermal decomposition of $(Cu^{I}_{8}Cu^{II}_{6}$(D-penicillamine)$_{12}Cl)^{5-}$, 5
Zn and Ag ion coordination by pyrido[1,2-*a*]-pyrimidine derivatives, 61

Magnesium complexes
speciation studies in relation to Mg bioavailability; formation of Mg(II) complexes with glutamate, aspartate, glycinate, lactate, pyroglutamate, pyridoxine and citrate, and appraisal of their potential significance towards Mg gastrointestinal absorption, 179

Metal complexes
preparation of trinuclear adducts from quadridentate Schiff base Cu(II) complexes with metal(II, III) nitrate, 1
stabilities of bivalent metal complexes with biologically active 2-hydroxy-1,4-naphthoquinone monosemicarbazone (HNQS) in dioxan–water mixtures, 211
tetracycline adducts with 3d metal perchlorates, L9
thiol-coordinated heme octapeptides of cytochrome *c*; model compounds of cytochrome P-450, 109

Metallopeptides
thermal decomposition of $(Cu^{I}_{8}Cu^{II}_{6}$(D-penicillamine)$_{12}Cl)^{5-}$, 5

Molecular structure
of dinuclear Cu(II) complexes derived from dinucleating Schiff base ligands, L1

Molybdenum complexes
interaction of molybdenite and aqueous Cu(II), L13

Molybdenum compounds
electrochemical properties of tetraethylammonium tetrathiomolybdate(VI), $[(C_2H_5)_4N]_2MoS_4$, L21

NMR study
exploratory ^{45}Sc NMR study into complexation of alanine and oligopeptides, 73

Nucleobase complexes
(μ-1-methyluracilato-N^3,O^4)(μ-1-methylcytosine-N^3,O^2)-*cis*-diammineplatinum(II)·silver dinitrate·silver nitrate·2.5H_2O, 155

Nucleoside complexes
depyrophosphorylation of adenosine 5′-triphosphate (ATP), 119
Pd(II) and Pt(II) ternary complexes with nucleosides and amino acids, L23

Nucleotide complexes
basicity of nitrogen donors in amino-substituted methylmercury derivative of adenine; crystal structure of μ-(adeninato-μ-N^6,N^9)-bis[methylmercury(II)]·ethanol, 191
some new derivatives of Co(III) with uracil, uridine and pyrimidine nucleotides, 197
FT–IR spectroscopic evidence of sugar ring conformational changes in GpC and CpG on platination and intercalation, 207
purine nucleotide–Cu(II) binary and ternary complexes; synthesis, electron paramagnetic resonance and infrared investigation, 215

Organic ligand complexes
speciation studies in relation to Mg bioavailability; formation of Mg(II) complexes with glutamate, aspartate, glycinate, lactate, pyroglutamate, pyridoxine and citrate, and appraisal of their potential significance towards Mg gastrointestinal absorption, 179

Organosilicon complexes
synthesis and characterization of biologically active organosilicon and organotin complexes of phenylglycyl hydrazones, 139

Organotin complexes
synthesis and characterization of biologically active organosilicon and organotin complexes of phenylglycyl hydrazones, 139
Oxidase
binuclear Cu(II) complexes as oxidase catalysts, L19
Oxo complexes
interaction of molybdenite and aqueous Cu(II), L13

Palladium complexes
Pd(II) and Pt(II) ternary complexes with nucleosides and amino acids, L23
Penicillamine complexes
thermal decomposition of $(Cu^{I}_{8}Cu^{II}_{6}$(D-penicillamine$)_{12}Cl)^{5-}$, 5
Peptide complexes
Cu(II) complexes of L-histidylglycyl-L-histidylglycine and L-histidyl-L-histidylglycylglycine; coordination mode of histidyl residues, 43
equilibria and kinetics of some metal complexes of peptide hydroxamic acids, 11
exploratory ^{45}Sc NMR study into complexation of alanine and oligopeptides, 73
reduction of haem peptides by dithionite; kinetic investigation, 101
thiol-coordinated heme octapeptides of cytochrome *c*; model compounds of cytochrome P-450, 109
Platinum complexes
aminomalonato(1,2-diaminocyclohexane)Pt(II); competitive antitumor compound within new class of neutral, chemically stable, water soluble, functionalized Pt(II) complexes, 27
FT–IR spectroscopic evidence of sugar ring conformational changes in GpC and CpG on platination and intercalation, 207
(μ-1-methyluracilato-N^3,O^4)(μ-1-methylcytosine-N^3,O^2)-*cis*-diammineplatinum(II)·silver dinitrate·silver nitrate·2.5H_2O, 155
Pd(II) and Pt(II) ternary complexes with nucleosides and amino acids, L23
synthesis and antitumor activity of organometallic *cis*-dichloro(enamine)(amine) Pt(II) complexes, 81
Polydentate ligand complexes
synthesis, characterization and antitumour activity of Fe(II) and Fe(III) complexes of 3- and 5-substituted salicylaldehyde benzoyl hydrazones, 167
synthesis of metal complexes of antimalarial drugs and *in vitro* evaluation of their activity against *Plasmodium falciparum*, 133
Porphyrin complexes
Mössbauer spectroscopic studies on concentrated protoporphyrin IX Fe(II) solutions, 151
Protein complexes
Ru-modified proteins; reactions of *cis*-$[Ru(NH_3)_4(OH_2)_2]^{2+}$ and *cis*-$[Ru(en)_2(OH_2)_2]^{2+}$ with azurin, myoglobin and cytochrome c, 33
Protein compounds
high molecular weight Zn- and Cu-binding proteins in liver of rat; effect of centrifugation, 129
Purine complexes
purine nucleotide–Cu(II) binary and ternary complexes; synthesis, electron paramagnetic resonance and infrared investigation, 215
Pyridoxol compounds
spectral properties and desmotropy of Schiff base of diethylaminomalonate and pyridoxal hydrochloride, 123
Pyrimidine complexes
Zn and Ag ion coordination by pyrido[1,2-*a*]-pyrimidine derivatives, 61

Radiochemistry
high molecular weight Zn- and Cu-binding proteins in liver of rat; effect of centrifugation, 129
Reduction
EPR study of Cr(V) and radical species produced in reduction of Cr(VI) by ascorbate, 115
of haem peptides by dithionite; kinetic investigation, 101
Ruthenium complexes
Ru-modified proteins; reactions of *cis*-$[Ru(NH_3)_4(OH_2)_2]^{2+}$ and *cis*-$[Ru(en)_2(OH_2)_2]^{2+}$ with azurin, myoglobin and cytochrome c, 33

Scandium complexes
exploratory ^{45}Sc NMR study into complexation of alanine and oligopeptides, 73
Schiff base complexes
observations on structure and magnetic properties of dinuclear Cu(II) complexes derived from flexible dinucleating Schiff base ligands, L1
preparation of trinuclear adducts from quadridentate Schiff base Cu(II) complexes with metal(II,III) nitrate, 1
Schiff base compounds
spectral properties and desmotropy of Schiff base of diethylaminomalonate and pyridoxal hydrochloride, 123
Semicarbazone complexes
stabilities of bivalent metal complexes with biologically active 2-hydroxy-1,4-naphthoquinone monosemicarbazone (HNQS) in dioxan–water mixtures, 211
Silver complexes
(μ-1-methyluracilato-N^3,O^4)(μ-1-methylcytosine-N^3,O^2)-*cis*-diammineplatinum(II)·silver dinitrate·silver nitrate·2.5H_2O, 155
Zn and Ag ion coordination by pyrido[1,2-*a*]-pyrimidine derivatives, 61

Sugar complexes
FT–IR spectroscopic evidence of sugar ring conformational changes in GpC and CpG on platination and intercalation, 207
Sulfur compounds
electrochemical properties of tetraethylammonium tetrathiomolybdate(VI), $[(C_2H_5)_4N]_2MoS_4$, L21

Tetracycline complexes
tetracycline adducts with 3d metal perchlorates, L9
Thiolato complexes
competition between Au(I) thiomalate 'myocrisin' and five-member and six-member heterocyclic ligands, 19
Transferrin complexes
structure/iron binding activity of 1-hydroxypyrid-2-one chelators intended for clinical use, 145
Trinuclear complexes
preparation of trinuclear adducts from quadridentate Schiff base Cu(II) complexes with metal(II, III) nitrate, 1

Uranyl complexes
sugar complexation with U ion; synthesis, spectroscopic and structural analysis of UO_2–fructose adducts, 67

Vitamin B_1 complexes
complexes of vitamin B_1 with transition metal ions; crystal and molecular structure of Zn(thiamine)$Cl_3 \cdot 0.4H_2O$, 85
structural behaviour of vitamin B_1 in bonding to H and metal ions, 37

Zinc complexes
complexes of vitamin B_1 with transition metal ions; crystal and molecular structure of Zn(thiamine)$Cl_3 \cdot 0.4H_2O$, 85
structural behaviour of vitamin B_1 in bonding to H and metal ions, 37
Zn and Ag ion coordination by pyrido[1,2-*a*]-pyrimidine derivatives, 61
Zinc compounds
high molecular weight Zn- and Cu-binding proteins in liver of rat; effect of centrifugation, 129
